

## NewPreA5101 Smart Controller

# NewPreA5101

Medium-sized Smart Controller

### >>> Overview

The NewPreA5101 is a medium-sized smart controller designed for high-end equipment and intelligent production line markets. It supports use in environments with high humidity, salt spray, mold, wide temperature ranges, and harsh electromagnetic interference. It seamlessly integrates logic control (PLC), machine vision, HMI, database, and customer applications into one controller hardware platform and provides an open secondary development interface. This helps users design low-cost, safe, and reliable industrial control solutions quickly and easily.

**Software Architecture** 

## Integrated display, vision, control and customer applications

 Integrate display, control, vision and customer applications into one controller to simplify system structure and reduce user costs.

#### Shared memory for efficient interaction

- NewPre The A5101 shared memory function provides a standardized API, which can achieve data communication with a delay of less than 5ms between application software and between non- real-time application software and PLC.
- Significantly improve production cycle

#### Compact size for extreme space efficiency

- Traditional industrial computer + PLC solution is reduced to one controller, which greatly reduces the area used in the cabinet.
- Compact design, size 47x172x122mm

#### System isolation ensures device security

• Through Intewell virtualization, each system is assigned an independent processor core and runs internal The real-time side applications are not affected when the non-real-time side is overloaded or down .

Windows (Non-RT)	RTOS (RT)			
Core0-Core2	Core3			
6.2G RAM	900M RAM			

#### Integrated machine vision and control applications

- The main body can integrate 2- way machine vision
- Supports AI vision to complete complex defect detection
- Supports 2D vision traditional detection, recognition, guidance and measurement functions
- It can realize counting packaging, laminating, and can be used with SCARA and DELTA robots

#### Autonomous and controllable

- NewPreA5101's real-time operating system and MaVIEW<sup>®</sup> intelligent control tool software platform are both independently developed
- Kyland has mature domestic desktop operating system technology reserves, EtherCAT, Modbus and other communication protocols master the protocol stack source code
- Kyland has the experience and technical reserves in developing independent hardware platforms such as Loongson, Hygon, and Feiteng, and can provide 100% independent and controllable products in a short time.

#### Supports rich communication protocols

- Northbound communication protocol supports OPC UA, Modbus TCP, EtherNET/IP, TCP/IP free protocol, S7
- Southbound communication protocols support EtherCAT, ProfiNET, Modbus TCP, EtherNET/IP, TCP/IP free protocol, AUTBUS

#### Function library development tool: Lib Developer

 Support users to use C/C++ language to develop the function blocks they need. And use Lib developer is encapsulated as a MaVIEW function block.

#### High protection level

EMC Industrial Level 4 Coping with high electromagnetic interference environment

Conformal coating Resistant to humidity, salt spray, and mildew

Wide temperature operation

### Product Specification

Specification	ı	Detail
	CPU	Intel*Celeron*J6412
	RAM	8GB
	Diskspace	256GB
	Ethernet	LAN ×3 (RJ45)
Hardware	ATB	AUTBUS × 1
	USB	USB3.0 × 3
	Video	HDMI × 1
	I/Os	$ON \times 1$ , $RL \times 1$
	LEDs	LED ×8 (PWR, ATB, HPD, USR, HDD, POK, RUN, ERR)
	Retentive memory	256Kb (Coming Soon)
Power	Input Voltage	$24$ VDC ( $\pm 10\%$ ) with overcurrent protection

Specification		Detail		
General info	Dimension	$47 \times 172 \times 122$ mm (W ×H ×D)		
	Weight	1.2kg		
	Cooling Method	Heat sink, no fan		
	Mounting Method	DIN Rail/Wall Mount		
Environment	Operation Temp.	-20°C~ 60°C		
	Store Temp.	-40°C~ 80°C		
	Humidity	10% ~ 95%RH		
	Altitude	≤2000m		
Standards	IP Rating	IP40		
	EMC	Grade 4		
	Shock	IEC 60068-2-27		
	Vibration	IEC 60068-2-6
